

Teachers' Association.

Another meeting of this association was held on Friday evening. The meeting was called to order by Prof. L. F. Monch, and prayer offered by Mr. W. H. Crandall.

The minutes of the previous session being read and accepted, the reports were next in order and were rendered.

Mr. E. H. Anderson addressed the association at some length on the famed German author Goethe, whose mother, the speaker said, had an exquisite fine taste for the beautiful, while through the careful teaching of his father, Goethe was enabled at the youthful age of eight, to write in French, Italian, Greek, and English, showing him to be a genius from his birth. The incidents in Goethe's life—his methods of overcoming some of his natural weaknesses (such as his painful sensitiveness to sound etc.)—his labors up to, and after his thirtieth year, (the turning point in his life), and especially his very numerous love affairs, were all attentively listened to and well received by the audience.

Wm. H. Jones illustrated the difference between the "Aristotelian and the Baconian systems of Philosophy."

In answer to a question propounded at the previous meeting, Mr. C. Brown stated the Senate passed judgment in case a bill of impeachment is sustained against the President of the United States.

A very interesting answer was given in regard to that most peculiar person, Robert Edge, the unknown preacher, by Mr. H. B. Belnap, who has traveled and searched much after information with respect to this person.

Program for March 10, 1882:

Opening Exercises.

Minutes.

Reports.
