

WEBER STAKE NOTES

A very enjoyable dance, which was largely attended, was given by the seniors, Friday evening, at the academy amusement hall.

Ephraim Tillitson, a student of the preparatory department has executed several good drawings and paintings. Friday he presented his teacher with a fine water color painting of an Indian chief in full dress. His work is certainly commendable.

Earl Belnap, Lawrence Evans and Ephraim Tillitson comprise a trio of mid-year graduates from the preparatory department, who will commence their work in the high school, Monday.

The students in chemistry visited the gas works a short time ago and have since been busy writing their essays on the manufacture of coal gas.

The zoology class, which completed the course Friday, is by far the largest in the history of the academy. This course is to be followed by botany, a class in which will be organized Monday.

Notwithstanding the fact that two and three parallel sections have organized in the subjects of mathematics and English respectively, the class rooms have been taxed to their utmost capacity to accommodate the large number of students registering for these courses.

The faculty, recognizing the fact that many students come to the high school illy prepared in arithmetic, has organized a class in this subject for the next semester. The course will deal with a general survey of the entire subject, emphasizing the principle rather than the rule.

The second semester commences with next Monday morning. The prospects for a material increase are very bright. Students may register in any of the following beginning classes: Theology, advanced arithmetic, algebra, elocution, grammar and classics, physical geography, orthography, penmanship book-keeping typewriting trigonometry, geology, Roman history, elementary rhetoric and German.

The lecture committee has received
