

IT'S A BEAUT—Grant S. Maw (left) examines with Jaycee Chairman Dean E. Jackson trophy to be given away in this year's college judging contest.

Jaycees Will Promote Judging Team Contests

Ogden Junior Chamber of Commerce members will again promote one of the major events of the Golden Spike show—the livestock judging contests for college and university teams.

The event gets added prominence this year, since it will ring up the curtain on the nine-day program, Friday, Nov. 13, at 8 a.m.

Since the Jaycees took over the college judging events about eight years ago, the activity has grown to among the top three or four in the nation in size and influence. It may even ascend to a higher ranking this year.

The Jaycees named Dean E. Jackson chairman of the program. He and his committee mailed invitations to 16 institutions of higher learning that teach animal husbandry and related subjects to enroll a team.

Instead of the traditional Saturday evening banquet for team participants and their coaches, a morning breakfast will be held this year. The breakfast is scheduled for Saturday, Nov. 14, at 8 a.m., in the Canton Cafe.

Other members of the Ogden Junior Chamber committee named to work on the intercollegiate program are Stewart Radmall, publicity; Don Higgs, reasons; Don Banford, banquet; Grant Maw, correspondence; Gordon Belnap, acceptance; Darrell Tuttle and Alan East, trophies.

The Ogden Chamber of Commerce lends its support to the program by financing the breakfast program.

College judging is one of the most interesting contests of show week.

The collegians are grouped into teams, and they look over various classes of breeding, fat and market livestock, list reasons for placing the animals as to first, second and third, then turn their cards over to expert judges of the show for checking.

This amounts to an extension course in animal husbandry for the participants, who are able to ex-

Corn-and-Hog Ratio Mounts

WASHINGTON (UPI)—The Agriculture Department reports that the corn-hog ratio went up between mid-September and mid-October.

The figure shows that relation between corn and hog prices, a rough indicator of the profitability of hog production.

Hog prices dropped during the month but corn prices declined too. As a result, the ratio rose slightly, from 12.3 to 12.7, a favorable trend as far as hog producers are concerned.

\$44,000 Grant To Help USU Study Disease

LOGAN—The nature of immunity to bovine coccidiosis, how it is developed and its duration in cattle of various ages will be objectives of an animal disease study now under way at Utah State University.

The U. S. Public Health Service through its National Institutes of Health, has announced award of a 44,000 research grant to the university to be used by the Utah Agricultural Experiment Station for the study.

Dr. Datus M. Hammond, head of the department of zoology, entomology, and physiology at USU and Dr. M. L. Miner, head of the department of veterinary science, will direct the study which it is hoped may lead to ultimate control of the cattle disease.

The grant is to cover the three-year period of research, with \$16,100 available for the first year and \$14,850 in each of the two succeeding years.

SOMETIMES FATAL

Coccidiosis, a disease of the intestinal tract, is one of the major diseases among both beef and dairy cattle. It sometimes is fatal but invariably retards growth and hurts the general health of animals.

The USU scientists will use some newly developed surgical techniques to shed further light on this disease of the digestive tract.

Working with calves from a day old up, the two will produce an immunity to coccidiosis by induced infections in order to study the mechanism of the immunity and how it protects, Dr. Hammond said.

The work will be conducted in close cooperation with U. S. Department of Agriculture animal disease and parasite research workers who are working on other phases of the problem at the Utah Experiment station.

COLLEGE TEAMS, SHEEP EVENT WILL GET JUDGING UNDER WAY

The program of judging gets the show in gear on Nov. 13. The complete schedule for this end of the exposition is as follows:

FRIDAY, NOV. 13

8 a.m.—College Judging. Spellman Collins, judge.
8 a.m.—Breeding Sheep. Spellman Collins, judge.

SATURDAY, NOV. 14

8 a.m.—Individual Fat Steers and Heifers, Junior Department followed by open classes. Rufus Cox, judge.
8 a.m.—Breeding Sheep—continued—followed by individual Fat Lambs. Rufus Cox, judge.
8 a.m.—Individual Fat Hogs.
9 a.m.—Pen Bulls. Harvey McDougal, judge.
3 p.m.—Grand Champions of the 1959 Show.

SUNDAY, NOV. 15

8 a.m.—Purebred Aberdeen-Angus Cattle. Rufus Cox, judge.
8 a.m.—Purebred Shorthorn Cattle. Doyle Mathews, judge.
9 a.m.—Sales Bulls. Harvey McDougal, judge.
11 a.m.—Carlots Fat Hogs.
3 p.m.—Carlots Fat Lambs. Spellman Collins, judge.

MONDAY, NOV. 16

8 a.m.—Purebred Hereford Cattle. Harvey McDougal, judge.
12 p.m.—Carlots Feeder Cattle. Harvey McDougal, judge.
12 p.m.—Pens Feeder Cattle. Harvey McDougal, judge.
12 p.m.—Carlots Fat Cattle. Don Priest, judge.

TUESDAY, NOV. 17

9 a.m.—Purebred Dairy Cattle.

Nonfat Milk Hits New Peak

WASHINGTON (UPI) — Government reports showed today that nonfat dry milk production in September reached 96,200,000 pounds, a record for the month.

The Agriculture Department how-

ever, gave no indication whether this would lead to a quick buildup in price support stocks or to a resumption of government donations for relief food use.

The department recently cut off donations both at home and abroad because stocks were low. Welfare agencies which distribute the milk to needy people overseas were upset by the move.
