IF YOU HAVE A DAUGHTER OR SON in the graduating class of one of our high schools this year, you are probably well aware of the problems you face in providing the financing for a college education. You are doubtlessly well aware of the obvious necessity of a college education in today's highly competitive economy, too!

THE FUTURE PROMISES AN EVEN MORE COMPETITIVE SITUATION . . . so, right now is an excellent time to establish and maintain a Commercial Security savings account that will help you provide for the education of the younger children in your family. It's never too early to start . . . in fact, the sooner you establish your program, the easier the task becomes.

You'll bank your best at the new

OPEN A COMMERCIAL SECURITY SAVINGS ACCOUNT, NOW . . . then budget your income to provide for regular payday deposits to that account. It takes determination .... and perhaps a bit of sacrifice at present . . . but isn't that better than a major sacrifice later . . . better than the necessity of going into debt to provide that education . . . better than not being able to provide it?

MAKE IT & JOINT PROJECT . . . you'll encourage your youngsters to save by opening the "College" accounts in their names. Deposits from their own earnings will add to your payday deposits . . . and, in that way, your children learn the importance of thrift as well as the value of money and how to handle it wisely.
