Utahns' Income Still Increasing

By Cliff Thompson

Utah's per capita personal income climbed 4.42 per cent last year to an average \$1,936 for each man, woman and child in the state.

Total personal income reached \$1,753,000,000 in 1960, an increase of 6.7 per cent over 1959.

Both gains were greater than the nation as a whole which experienced a 3.84 per cent increase in per capita income and 5.5 per cent in total income.

However, Utah's per capita income was still below the national average of \$2,242 and the Mountain States' average of \$2,067.

Between 1955 and 1960, total personal income rose 40 per cent in Utah and 31 per cent in the nation. Per capita income increased 24 per cent in Utah and 20 per cent in the nation during the same period.

Wins Service Award

Owen A. Bennett has received a 7-star gold pin donating 35 years of service with Swift & Co. Mr. Bennett started his career with Swift as a smoker in the firm's Salt Lake City branch June 8, 1926. He transferred to the Ogdens plant in 1949.

Elected to Post

Bernie Diamond, manager-secretary of the Ogdens Chamber of Commerce, has been elected first vice president of the Mountain States Association.

President of the group representing chambers of commerce and other trade associations in the eight western states is Calvin K. Snyder of Denver.

As first vice president, Mr. Diamond will become president of the group next year.

The elections were conducted at the association's annual meeting in Boise where a national director of the U. S. Chamber of Commerce urged businessmen to take a more active roll in government.

"We must cast aside talk that politics is too dirty for businessmen to get mixed up in," said Robert Timin of Albuquerque, N.M. "If politics is a dirty word, then I must say it is because you and I have not been properly interested or willing to make the necessary sacrifices. We have been willing to let something less than the best rule us."

POWER FOR MINUTEMAN

Solid propellant fuel for the Minuteman missile has a resemblance to chocolate taffy during one stage of its manufacture. Above workmen at the Thiokol Chemical Corp. in Box Elder County remove the last of a 300-gallon batch of Minuteman propellant from a mixer. From the mixer, propellant flows into large casting can for transportation to engine loading area where it is cast into the first stage of the Minuteman. The propellant is then cured to a hard rubbery solid.

Fair Fans to See N.Y. 'Copter View

NEW YORK (UPI) — Visitors to New York's World's Fair in 1964-65 will be offered a simulated helicopter view of the entire city, according to recently approved plans.

A city model, on a scale of one inch to 100 feet will be constructed, showing each of the about 1 million structures in the city. Viewing cars will be suspended about it for a trip around the perimeter. Pedestrians will be able to make the trip on a stationary balcony.

Like 'Freeloader'

ATLANTIC CITY, N. J. (UPI) — The New Jersey Association of Chosen Freeholders — county governing officials in New Jersey parlance — voted down a proposal to change the group's name merely because it sounds too much like "freeloader."

OGDEN BOARD of Realtor plans are discussed by new officers Blaine Hansen, vice president; Ben Van De Graff, president, and Ivan J. Heslop, executive secretary (left to right). The new treasurer, Gordon Belnap, was absent when photo was taken. Elected directors of the organization were William J. Brian, Arden Johansen and Lubin Welker.

SP Names Engineer

Lee D. Marsden has been named engineer for the Southern Pacific Co.'s Salt Lake division. He succeeds Russell E. Frame who has been transferred to San Antonio, Tex.

A native of Portland, Ore., Mr. Marsden comes to Ogdens from Sacramento, Calif. where he has been senior assistant engineer of the SP's Sacramento division. Mr. Marsden also spent a year as an engineer on the SP's Great Salt Lake fill project in 1956.

Gets AF Contract

The Marquardt Corp. will begin work soon on a multi million dollar Air Force contract to develop a new bombardier-navigator radar training system. Work will be done at Marquardt's Pomona, Calif., division.

ROY ISSUES 23 PERMITS FOR BUILDING IN MAY

ROY — Twenty-three building permits totaling \$265,021 were issued in Roy during May. Of that number, 11 were for single family dwellings representing an investment of \$220,101.

This compares favorably with 20 permits issued in April totaling \$166,621. In April only eight of the permits were for homes.

A year ago in May, the city issued 17 permits with a total valuation of \$185,497.

One major permit amounting to \$22,000 was issued to Glade Nielson for a professional clinic being remodeled at 5756 S. 2000 W.

Miscellaneous permits including five for additions to existing dwellings and one garage totaled \$21,720.

Employment, Production Gains Push U.S. Economic Barometer Up Again

By Jack Leffer

NEW YORK (AP) — The economic barometer read during the week: Production up. Employment up.

These twin developments accelerated business' rise from the recession and, government economists said, gave promise of further advance.

The Federal Reserve Board reported production of mines, factories and utilities increased three per cent in May.

The board called the gain a further sharp recovery and said it was widespread.

Increases included production of automobiles, iron and steel, television and radio sets, furniture, clothing, business equipment, farm machinery, construction materials, textiles, chemicals and paper products.

AUTO GAINS

Additional gains were predicted for automobiles and steel in June.

The Labor Department announced improvement in three segments of the employment picture in May.

Gains were made in employment in heavy industry, the factory work week and overtime hours.

An increase of 150,000 in employment in durable goods manufacturing, mainly in the automobile and steel industries, brought the work force to 9,989,000. Manufacturing employment usually shows a small drop in May.

The average factory worker's work week increased to 39.6 hours in May from 39.3 in April. This was the fourth consecutive monthly increase. Average weekly overtime hours increased one-tenth of an hour to 2.1 hours.

Some other bright straws in the economic wind:

MORE SPENT

Consumers spent more in May. The Commerce Department reported seasonally adjusted sales of retail stores rose to \$18.1 billion from \$17.9 billion in April.

Applications for Federal Housing Administration insurance for new home mortgages in May rose five per cent above April.

With summer just around the corner, indications were that Americans will go all out in spending on vacations. Hotel and travel reservations were reported up. Vacation spending may top the \$25 billion last year.

General Electric Co., one of 29 firms convicted of antitrust viola-

tions in price-rigging of electrical equipment, said the government had hinted it might take steps to break up the firm if GE didn't sign an agreement not to sell at "unreasonably low prices."

Steel production has leveled off after three months of increases. The week's output totaled 2,042,000 tons off 1/2 of 1 per cent from the previous week.

However, U.S. Steel Corp. lighted 12 furnaces in its fourth and last open hearth shop at the Gary, Ind., works. Republic Steel Corp. re-

sumed operations at its large-diameter pipe mill at Gadsden, Ala., and recalled 300 workers.

Steel price cutting spread to steel wire rope and reinforcing bars. It had begun with reductions for stainless steel and oil-country and transmission line pipe.

Automobile production jumped for the week to the highest level of the year when 131,000 passenger cars were turned out. This compared with 127,383 the previous week and 137,754 a year ago.

To Build Rail Cars

Union Pacific Railroad plans to build 1,100 new freight cars at a cost of \$14,900,000. The cars will be built in the UP's Omaha during this year and early 1962.
