

MARCHING ROUTINE to be presented by students of Wahlquist Junior High Friday evening is rehearsed by Rosie Endow, Sandra Deamer and Linda Stratford (left to right).

PHYSICAL EDUCATION

900 Students to Perform In Junior High Program

FARR WEST—Some 900 students of Wahlquist Junior High School will take part in the annual physical education review Friday evening. The event, which is being combined with a fund-raising project of the PTA, will be held at the Weber High School gymnasium beginning at 7:30 p.m.

Students will display their talents in dancing as well as exhibit calisthenic abilities, rope and tumbling routines and relays.

DANCE NUMBERS

Dance numbers will vary from folk to waltz and charleston to the twist. A special marching drill will be performed by girls with flags.

During the review, members of the PTA will be selling cakes, homemade candy, cupcakes, popcorn balls and other similar items. The proceeds will go towards the organization's scholarship fund.

Admission to the review is free. Principal Spencer Wyatt said. The gym has a seating capacity over 1,500 and all parents are invited.

Chief Deputy Treasurer Will Retire

George A. Compton, Weber County chief deputy treasurer, will put aside his "figures and books" and retire Friday after 43 years of service.

The son of a pioneer, George Compton of Morgan, the chief deputy will not lack for things to occupy him. A lifelong fisherman and gardener, he will devote much of his spare time to these hobbies. "You can spend a lot of time gardening," he said, "especially with annuals. You've always got to be preparing the ground or something."

If he should tire of his avocations he can visit his three sons, Budd M. Compton, a civilian radar engineer at Colorado Springs, Colo., working with space age programs. Or Merlin D. Compton, a professor at Adams State College in Alamosa, Colo.

Or Lane A. Compton, now on sabbatical leave as a professor at Brigham Young University.

20 GRANDCHILDREN
Closer at home are two daughters in Ogden, Mrs. William J. Eckersley and Mrs. James Montgomery. With a total of 20 grandchildren neither Mr. Compton nor his wife expects his retirement to be the least bit boring.

Mr. Compton began work with the county treasurer's office soon after he graduated from business college in Salt Lake City.

During that period he has seen the number of tax receipts climb from 12,600 to 46,685 in 1961. This, in spite of the fact that the county assessor now handles all automobile and personal property taxes formerly done by the treasurer and his staff.

During his 43 years he has worked for four county treasurers: David Evans, Arias Belnap, Ernest McKay and Linn C. Baker.

Disabled 'Cat' Delays Survey

A planned snow survey trip to the upper Beaver and Monte Cristo was postponed Wednesday because the Snowmobile operated by the Soil Conservation Service crews broke down in Logan Canyon Tuesday.

Kent Hortin of the SCS said the Monte Cristo trip was to be made today.

Snow measurements will be made at upper Ben Lomond Friday and at Snow Basin and Mt. Ogden Saturday, Mr. Hortin said, unless plans have to be changed again.

A trip to Little Bear, at the head of North Fork on the Bear River watershed, will be made some time next week, the SCS man said.

Leave of Absence Granted, Another Denied by Board

One application for a leave of absence was granted by the Board of Education and another one was turned down.

The application for another year's leave made by Keith J. Checketts, who is now studying for his master's degree, was given an official okay by the board. Mr. Checketts will study at the University of Minnesota next year for his doctor's degree.

Collins L. Hunsaker, business instructor at Highland Junior High, had asked for a leave of absence effective immediately so he could leave for a summer job at the Seattle World's Fair.

The board turned down this request.

Will Build Shed

A building permit to put up a \$700 storage shed for the J. and K. Drive Inn at 385 Washington has been applied for by A. E. Chatwin.

Riverdale Delays Signing Contract To Cover Relocated Utility Lines

RIVERDALE—A contract giving the city engineer complete charge of the reconstruction of utility lines that will be upset by the construction of Interstate 15 needs further clarification, the Riverdale City Council feels.

The contract prepared by Templeton and Linke Consulting Engineers at the direction of the State Road Commission would authorize the engineering firm to act as agent for the city during the construction phase of the federal highway.

Mayor G. Edwin Anderson said he understood the state would assume all costs of moving utility lines, but according to the outlined contract neither the state nor the cost involved is mentioned.

According to the proposed contract, Mayor Anderson explained, the engineer would charge to the city the cost of moving utility lines plus 50 per cent and in addition 11 cents per mile car expense.

This would be reimbursed by the state, the mayor said he had been informed. However such an agreement has not been sent to the city by state officials, Mayor Anderson said.

The mayor said, and councilmen agreed, signing the contract "as is" would be much too premature.

Councilman Herman Fiet said he thought the project should get further along before authorizing the engineer's expenses.

Councilman Roscoe Child, road department head, was asked to check with State Road Commission officials and then refer the contract back to the engineering firm.

The stretch of Interstate 15

through Riverdale involved in the contract will run along the west perimeter of the city limits and connect with an interchange in the vicinity of the Ogden City dumps on the 33rd Street Expressway.

Uintah Approves Mausoleum Plan

UINTAH — The Uintah Town Board has approved a request from the Aultorest Mortuary for permission to erect a mausoleum in the Uintah Cemetery.

James Harbertson, member of the board and go over details. He said the mausoleum was expected to be completed before Decoration Day.
