

NUCLEAR DETECTION device is examined by Kenneth E. Knapp, administrator of Dee Hospital (left) and Dr. J. Ronald Galli, chairman of the physics department of Weber State College. The college's Development Fund purchased detection equipment from the hospital for \$300.

## College Buys A-Device

Nuclear detection equipment originally purchased for \$36,000 has been sold at a token sum of \$300 by the Dee Hospital to Weber State College.

The Weber State College Development Fund announced the transaction.

Organized by authority of college trustees, the fund's purpose is to obtain money and equipment beyond what can be acquired through state appropriations.

Richard E. Myers, fund chairman, said the college will use the detection equipment for instruction and training purposes in the physical science department.

It was sold to the college for the small amount through an arrangement with Kenneth E. Knapp, Dee Hospital administrator.

Mr. Knapp said the transaction became possible because the hospital is buying more sophisticated nuclear instruments to meet the advanced

standards of the institution.

"However, the equipment being transferred to the college is of high caliber and has great value for students and faculty in the physical science classes," he said.

"The Dee Hospital works very closely with the college in its nursing program, X-ray and other technical training areas, and we feel that the use of this equipment at the college will ultimately serve many purposes," he added.

The equipment includes several high voltage power supplies, rate meters, linear amplifiers, sodium iodide scintillation crystals and radiation scanners.

**PHYSICISTS HELP**

Mr. Myers expressed his appreciation to Alan Harbertson, a staff member in the physics department, and to David Tripp, an assistant professor of physics, who were instrumental in working with hospital officials to obtain the equipment.

Commenting on the value of the equipment to the college, Dr. J. Ronald Galli, Physics Department chairman, said, "Because of the high cost of technical equipment in the nuclear research field, it would have been impossible for the college, at least within the immediate future, to have obtained such apparatus."

**GOOD EXAMPLE**

Mr. Myers said Development Fund officials consider the transaction as an excellent example of the community working to help the college.

"There is often a situation where a company, industry or firm has equipment on inventory that could be of great value to the college—often with little cost to the donor."

"The Weber State College Development Fund encourages such gifts or sales to the college and we would be glad to work out the details involving gifts and grants," he said.

## ICC Denies SP Petition On Rail Line

Won't Dismiss UP Application On Spur to Lake

The Interstate Commerce Commission has denied a Southern Pacific Co. petition to dismiss an application by Union Pacific Railroad to build a spur to the edge of Great Salt Lake, Sen. Frank E. Moss, D-Utah, reported Tuesday.

Denial of the petition means public hearings on the case will go ahead, Sen. Moss said.

Hearings are scheduled to begin Dec. 11 in Salt Lake City and continue Dec. 13 in Ogden.

At the same time, the Weber County Industrial Development Bureau announced its support of the Lithium Corp. of America, Inc., in its request for additional railroad service.

### FORMAL ACTION

A resolution spelling out its commitments to Lithium and to the corporation president, Harry D. Feltenstein, was approved Tuesday by directors of the bureau.

Purpose of the spur would be to permit shipment over Union Pacific rails of minerals and chemicals to be extracted from brines of Great Salt Lake.

Southern Pacific already has access to that portion of the lake shore and is opposing UP's application.

### FOLLOW LEAD

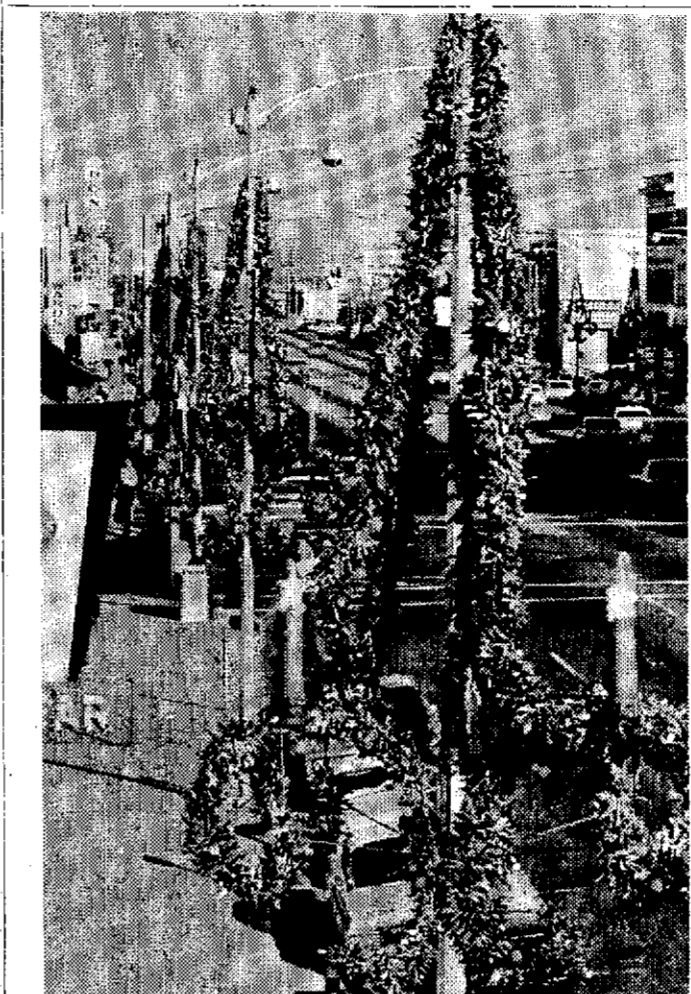

The Greater Ogden Chamber of Commerce, Ogden City and other communities in the county, as well as Weber County itself are expected to follow the industrial bureau's lead in the next few days.

Director David Allred said it was felt the bureau should follow this course because several years ago it committed itself to "inducing industries, and specifically Lithium, SP and UP to develop industrial parks and sites at the lake."

As part of its pledge to Lithium, the bureau agreed to assist in developing necessary fuel, electricity, water, road and railroad facilities, the director added.

## BOARD WILL MEET

An agreement on the joint operation of the Ogden-Weber Education Center, a proposed \$1.2 million educational plant for educating mentally handicapped trainable children, will be aired by the Weber Board of Education Thursday.

GAY TINSEL on light poles in downtown Ogden lead a festive air as shoppers begin their annual Christmas buying.

## 'TIS THE SEASON

## Downtown Dons Christmas Attire

Rustling in wintry breezes and glistening in the rays cast by colorful bulbs, some \$15,000 worth of blue and silver tinsel annually transform downtown Ogden into a Christmas wonderland.

Purchased and owned by Greater Ogden Chamber of Commerce with funds supplied by downtown businessmen and property owners, the decorations used this year are in their fourth season.

## Realign Municipal Wards, Attorney to Ask Council

### Richards Says Population Shift Has Created Serious Imbalance

Four new Ogden City councilmen will face their first major challenge Thursday at 6 p.m.—a recommendation that boundary lines of Municipal wards be changed.

The new councilmen and three veterans also will be asked to decide if Ogden should have helicopter service and whether the city should resubmit its application for a 'Model Cities' grant.

In their first session since the council was organized on Nov. 20, members will consider a report from the public works director regarding a request to lower the surface of Patterson, filed by Harry C. Martin of 735 Patterson.

Also scheduled is a decision, postponed from Nov. 16, on a proposal to rename a section of Harrison, and a request from the Wasatch Slopes Cutter Racing Association to use city property near Browning Armory for its races.

Other business will include a petition to rezone to Residential R-3 a lot at 1st and Jefferson, adjacent to the Utah Industrial School, and a Planning Commission recommendation for approval of a final plat of Hunter Hill Subdivision No. 7.

New councilmen include Wesley G. Harline, Vern Wilcox, B. R. Diamond and George T. Frost. Veterans on the board are Mayor Bart Wolthuis, Harm DeBoer and assistant mayor Karl O. Macfarlane.

Recommendation for the change in boundary lines came from Corporation Counsel Jack A. Richards and Recorder Mary E. Smith.

Boundaries have been realigned only once since the charter was adopted and that was in April 1953, Mr. Richards said.

### WARDS NOT EQUAL

Registration for Nov. 7 Municipal elections indicates, contrary to city ordinances, the four wards are not "reasonably equal" in population, counsel added.

First Ward registration was 6,053, 2nd Municipal Ward, 10,059; 3rd Ward, 9,433; 4th Municipal Ward, 9,593.

"Council should give serious consideration to realigning ward boundaries so they will be more nearly equal in population as is required by the City Charter," Mr. Richards said.

Request for helicopter service to Ogden was filed by Roy L. Morgan, chief pilot for Kelsey, Ellis Air Service, Inc., of Salt Lake City.

The firm has offered to provide ambulance service to hospitals and air taxi flights for business and professional persons.

### FUNDS AVAILABLE

Council will decide whether to schedule a meeting in Ogden or San Francisco with a member of the model cities staff, as recommended by Dr. Melvin Mogulof, director.

The director said Congress has appropriated additional planning funds for a second round of model cities, for which Ogden may apply.

Public Works Director Rulon H. Sorensen will submit a report on flood control measures the city is taking in the vicinity of Sullivan Hollow.

At the Nov. 16 meeting, Mr. Martin said lowering the surface of Patterson would permit flood waters which back up in his yard and house to vacate the area.

Mr. Sorensen argued, however, that lowering the level of the street will only create a problem elsewhere, but agreed to study the problem further.

Council had intended to rename a section of Harrison near 9th to Iowa, but a petition from residents of the area indicated they would prefer another name.

Residents have been asked to appear Thursday to indicate their preference.

## Board Ends Deadlock On TV Sale

The Ogden Board of Education has resolved a deadlock with the prospective buyer of the district's television facilities over provisions in the event he fails to successfully operate the station as a commercial venture.

The board and Salt Lake City businessman James Lavenstein have agreed to a stipulation that the district will have first option to take over any of Mr. Lavenstein's indebtedness should the business fail and go into bankruptcy, the board pointed out.

Final approval to this stipulation and other terms included in a comprehensive agreement between the board and Mr. Lavenstein must be given by the Federal Communications Commission before the sale is completed.

### OTHERS OKAY

All other provisions had been approved by the board earlier.

This had been pending until both parties could reach a satisfactory agreement.

Board President Leslie Norton said there are two areas which have concerned the district.

First that the district not be liable in the event of failure and subsequent foreclosure and second that the district could end up without comparable television facilities to which it now has, Mr. Norton said.

### REPLACE EQUIPMENT

Mr. Lavenstein explained he intends to replace the existing equipment for his all-color operation.

## Sergeant Returns From Asian Duty

Senior M.Sgt. Joseph W. Drysdale, son of Mr. and Mrs. Joseph Drysdale of 1070 22nd, has returned to the United States after a tour of duty in Southeast Asia.

He was assigned to Thailand and Vietnam air bases.

He has been stationed at Scott AFB, Ill., and will report after a brief stay with his parents in Ogden.

## HEARING SCHEDULED DEC. 12

## City, County Seek Equal Lake Shore Power Rates

Weber County commissioners and Ogden City officials announced Tuesday they will take united action to preserve equal power rates for industries located on the shores of the

Great Salt Lake.

City Manager Charles R. Kelley told the commission the Utah Public Service Commission has scheduled a hearing Dec. 12 on the petition of Raft

River Rural Electrification Association of Malta, Idaho, to extend service beyond Box Elder County to a portion of Tooele County.

Such a move, if granted, Mr. Kelley said, would provide cheaper power for industries on the west side of the Great Salt Lake, thus penalizing Weber County which borders the east shore.

The Raft River association, a cooperative operating under the federal Rural Electrification Administration, is authorized to acquire federal power from the Bonneville Power Administration.

Utah Power & Light Co., which serves Weber County, opposes the Raft River petition and indicates it cannot be competitive with federally subsidized power proposed by the REA cooperative.

David H. Allred, director of the Weber County Industrial Development Bureau, told the commissioners cheaper electric power offered on the east side of the lake would result in industrial prospects building in Box Elder and Tooele counties rather than on the lake's east shore in Weber County.

Commissioners, chairman Albert L. Bott, William S. Moyes and Maurice Richards warned they would oppose any move to set up federal power boundaries which would exclude Weber County.

Mr. Kelley said he and Mayor Bart Wolthuis also will oppose a difference in power rate structures which would threaten industrial development in Weber County. Mr. Kelley said the matter will be discussed at the City Council meeting Thursday night.

### HOOR OF DECISION

Since Weber County falls within the area where federal power would be available, the commissioners indicated support for the Raft River petition.

Chairman Bott said "Weber County stands at the crossroads and this is the hour of decision. Utah Power & Light is a big taxpayer and furnishes us services but the company must understand we should be interested in the growth of the area."

"We have budget problems that could be eased if we had private industry to share the tax load."

"We're at the mercy of federal institutions who provide general payrolls which require additional services. But the government has no tax base," he said.

## Chamber Mails Ballots For Vote on Directors

Ballots listing names of 14 candidates for seven seats on the Greater Ogden Chamber of Commerce Board of Directors were mailed today to voting members.

New directors will be seated for a three-year term, according to W. Beverly Howell, chamber president.

Votes will be counted and the new directors announced at a chamber meeting to be held Dec. 11.

### CANDIDATES LISTED

Candidates include the following: Donald L. Erickson, manager of Marquardt Corp.; Winston J. Fillmore, sales manager for Federated Dairy Farms; Lynn

Foley, division manager for Utah Power & Light Co.; Richard K. Hemingway, president of Commercial Security Bank;

B. N. Horstman, doctor of veterinary medicine, Ogden Animal Hospital; Dee Hutzley, manager of Wangsgard Market;

Clair M. Jackson, vice president of Jackson Finance and Thrift;

Dr. George H. Lowe, physician and surgeon; Dr. Quinn G. McKay, dean of the Weber State College Business School;

Clarence Paxton of the Pillsbury Co.; Jack Roche of Southern Pacific Co.; Richard Richards, Ogden attorney; Paul Sachter, manager of Utah By-Products Co., and Robert L. West of West's Jewelers.

## Boy Scout Pow-Wow Begins Here Saturday

A Boy Scout Merit Badge pow-wow will be held at the BYU-Ogden Center at 555 24th beginning Saturday and running each Saturday through Dec. 16.

Sponsored by the BYU-Ogden Center in cooperation with the Lake Bonneville Council, BSA, the pow-wow is organized to furnish scouts with expert instruction in various subjects in preparation for merit badge examinations.

### PROFESSIONAL TO HELP

Gordon Belnap, Lake Bonneville Council advancement chairman, said local professionals will instruct the courses at the three pow-wows.

Instruction in the following merit badges will be offered:

personal fitness, communications, cooking, first aid, rifle and shotgun shooting, skiing, safety and public health.

A general assembly will be held at noon each Saturday with classes from 1 through 4 p.m.

### REFRESHMENT TIME

Refreshment time will be from 4 to 4:30 p.m. Scouts are requested to report at the center by 11:30 a.m. Saturday.

Mr. Belnap urges all scouts interested in attending the pow-wows to pre-register in order to assure a choice of courses.

Registration for the entire program is \$3. Further information may be obtained by calling 399-4455.

## HE SUCCEEDS HIS BOSS

## Ogdenite Will Lead Air Force Chapter

An Ogden City aide has succeeded his boss as president of the Ogden chapter of Utah Air Force Association.

Members elected Ray W. Cassell, assistant to City Manager Charles R. Kelley and director of personnel to the chapter office.

Mr. Kelley, as outgoing president, automatically becomes a member of the chapter council.

Mr. Cassell is a resident of Sunset.

Other officers named were Everette G. Faunce, first vice president, Ogden; James T. Brown, second vice president, Riverdale; Willard Morton, Layton, treasurer, and Peter G. Boam, secretary, Ogden.

Other council members are Paul Lambert, John Lindquist, John Bull, Arthur Yaeger and Len Allen.

Mr. Cassell said the chapter has 175 members.

RAY W. CASSELL Heads Ogden Chapter.

BALLOTS for electing seven new Chamber of Commerce directors are prepared for mailing by D. Keith Hunt, executive vice president, and Marjorie Bailey, office manager.
